

We are committed to making sure our customers get the best service especially for Pump Rebuilds. We repair and service several brands of lubrication pumps. Keeping a wide selection of repair kits in stock to reduce turn around time.

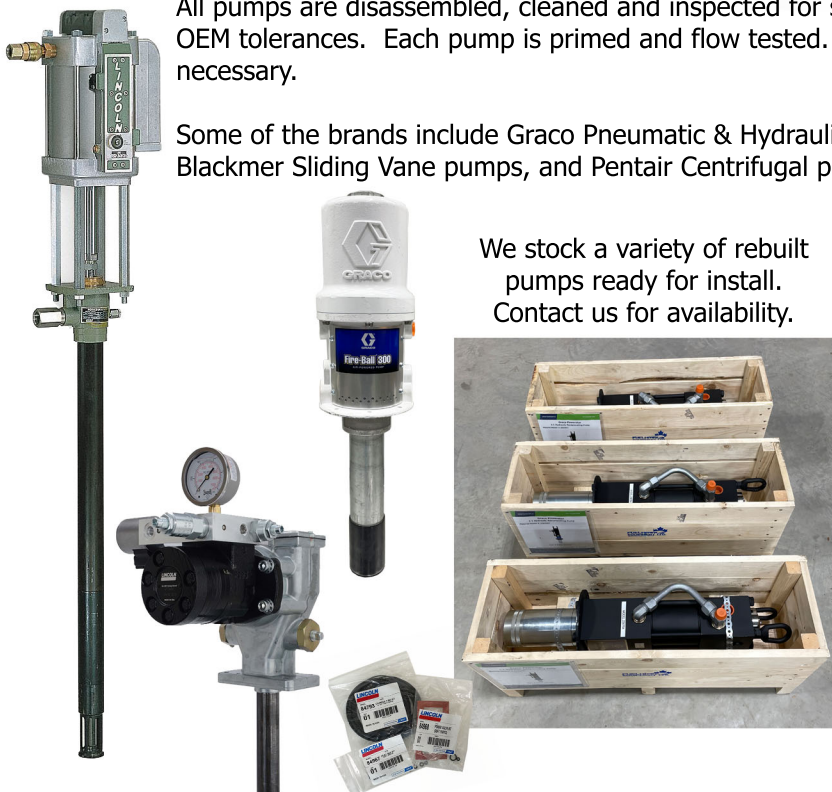

## Remanufactured Pumps

All pumps are disassembled, cleaned and inspected for service. We rebuild your pump using OEM parts, and OEM tolerances. Each pump is primed and flow tested. So it is ready to go when you need it. No soft start necessary.

Some of the brands include Graco Pneumatic & Hydraulic Pumps, Lincoln Air Motors and Hydraulic Pumps, Blackmer Sliding Vane pumps, and Pentair Centrifugal pumps.

We stock a variety of rebuilt pumps ready for install. Contact us for availability.

We offer a custom crate to fit the repaired pump. This crate is durable and reduces the packaging costs for transporting cores back for rebuilding. Alternate crate sizes available.
